U.S. STEEL STOCK UPHOLDS MARKET

Good News Regarding Steel Trade Caused General Feeling of Hopefulness.

ing of Hopefulness.

NEW YORK, March 21.—United States Steel was the mainstay of the stock market to-day; the large accumulation of that stock carried it to the highest price of the year, allowing for the 1-2 per cent. dividend which came off the price this week.

The contents of the pamphlet report of the company issued yesterday was responsible for this demonstration, especially those passages dealing with the conditions of the trade since the first of the year. A notable impression was made by the official assurance there given that the rate of expansion in the average daily orders coming for March was as great as it had been successively in January and February over the depth of the December depression.

The anxiety of the earlier part of the week caused by reports from Pittsburg that the revival of the steel trade was halting was allayed by this information.

The earlier reviews of the mercantile

was natured was allayed by this information.

The earlier reviews of the mercantile agencies gave conservative encouragement to the hopeful spirit prevalent in the stock market. Advices from the cotton manufacturers were an exception, and the rate of demoralization reported in the print cloth with plans for curtailment of productions were not liked. The expectation of a message from the President dealing with economic and labor conditions again came into force as a factor in the market.
